

## Novice Report 2020-2021

- The Covid sizing of 2 team per ice was a hit, and well received by most coaches. I did not get feedback from all at this point
- The sorting was missed this year as we did not have all players in their proper areas, but even the requests for assessment did not find any glaring issues.
- We had a large number of players (15) make Rangers this year which was a huge accomplishment for Metcalfe
- The scrimmages were in huge demand when we were able to do them. Without them we had a loss of interest and more children missing
- The coaches this year were outstanding and flexible as needed
- We appear to have a shortage of Goalies moving forward, but this was made worse without the ability to have more kids try it.
- No Jamborees and tournaments were a major downfall this year and should be emphasized in the next year to ensure teams get to experience them.
- No Major issues with respect to behavior or safety
- Should include Full length ice practices for learning positioning and rules in preparation of moving to Atom for the children moving up. This could be done at the end of the year.
- Equipment packages will need to be collected.

Covid Sucks, but MDHA hockey persists. Lol.
