

Annual General Meeting MDHA U13 Report 2019-2020

Given the pandemic there were no typical sort outs however, in September 3 “bubbles” were formed with 2 “groups” in each. Through the remainder of the season as the province allowed and disallowed hockey to continue the bubbles and groups remained relatively the same. Some players were added or removed as the season went on but the average number of participants in U13 was around 45 +/- . Each group was lucky enough to have a goalie which we were all very grateful for.

The bubbles and groups were sorted based on previous teams, levels, skills and knowledge of player’s ability. Based on my observations and feedback from all “group leaders” the players were placed appropriately.

During the season there was one positive Covid-19 case reported that affected one bubble which then required that bubble to isolate for 14 days. There was ice time lost however we were fortunate to be able to add on ice time at the end for those groups. The MDHA acted very quickly and proactively to notify all close contacts which helped stop the spread.

In a typical season this report would show year end standings for our teams, this season everyone was a GOLD MEDAL winner! Thank you so much to the amazing volunteers who made this season work in a world that seemed to be working against us and to the players and families who supported us along the way.

Way to go JETS! Stay Safe and see you next season at the rink.

Sincerely,

Julia Tuff

MDHA U13 Convenor
